

couleur caramel
natural make up

An innovative, original skin-care make-up line that combines natural and organic ingredients with new technologies to respect quality, the environment, human relations and animals.

Couleur Caramel aims at combining up-to date technologies with the clearest, most transparent use of any raw material that nature has to offer. Natural vegetable and mineral ingredients produced through organic farming provide real treating effects. Couleur Caramel offers rosin, formalin, mineral oil, paraben, phenoxyethanol and toluene-free formulas. The micronisation process consists in grinding the material by compressed air, thus resulting in spherical particles that are nine times thinner than ordinary powders. The aim of this process is to offer you an unequalled quality pigment, effective and easy application, perfect hold and really astonishing comfort. You'll achieve comfortable, user-friendly and fabulous natural results without any excess material.

The textures, fragrances and colours will immerse you in an ethical and innovative universe that combines beauty, well being and sustainable development. Couleur Caramel is with you during every moment of your life, to protect your skin and the future of our planet.
