

PARIS  
**COLLIN**  
G.M.

*Where  
Nature  
Meets  
Technology*

G.M. Collin products were developed with one goal in mind: To offer high-tech skin care solutions that are deeply rooted in the brilliance of nature.

G.M. Collin products are derived from natural plant and marine extracts and are biotechnologically developed to achieve results. While the ultimate goal is to offer the best skin care products on the market today, the true spirit of G.M. Collin is to help women and men look great while feeling good about how they achieved the results.

Dedicated to protecting the environment, G.M. Collin is proud to have been among the first in the aesthetics industry to embrace the Green Approach. From ingredient selection to recycled/recyclable packaging, every aspect of the manufacturing process respects the company's vision for a greener future.

In January 2010, G.M. Collin launched their **Bio-Organique** skin care line with 99% Natural & Certified Organic Ingredients, consisting of 8 essential high-performance products that make the skin healthier and brilliantly radiant by hydrating, balancing, and providing protection from external aggressions. The **Bio Organique** Line was created in the spirit and philosophy of uniting with nature and respecting our resources.

*8 Clinical Treatments are available to achieve and maintain radiant skin. Designed with your individual skin care needs in mind, our comprehensive treatment lines promote relaxation and comfort. Home care products from our retail line properly help your skin to optimize the efficacy of these treatments.*
